

Pipeline Safety Management System

Overcome your federal compliance challenges with our Dynamics-based solution.

Impactful solutions, smooth delivery

Robust, Flexible, & Effective

Spruce's project delivery experience has driven the development of several easily replicable solution models. Our Pipeline Safety Management solutions help clients to automate and maximize compliance with federal and state laws.

- Proven Results
- Rapid and smooth delivery
- End-to-End guidance and post-implementation support

Optimize Inspections

- Modules fully mapped to codes and regulations
- Pre-configure inspections, and make simple field modifications
- Real time monitoring of all inspection cycles

Fortify Enforcement

- Eliminate processing errors with One-click document generation
- Effortlessly Maintain auditable record of complete compliance lifecycle
- Instantly produce all court-required documentation

Maximize Awareness

- Stay connected with complete mobile functionality for field inspections
- Automated notifications, alerts, and scheduling
- Third-party integration capabilities

Quick Study: An Intuitive User Experience

The Power of a Joint Solution

Our solution leverages the awesome power of Microsoft's Dynamics 365 platform to bring you:

- **Experience:** Spruce is a Microsoft Gold Partner ranked in the top 1% of all MS Dynamics partners worldwide
- **Prevalence:** Join the global community of users who have already discovered the power of Microsoft Dynamics 365.
- **Stability:** Operate with confidence on a trusted platform with regular security updates and 24/7 support.
- **Familiarity:** Standard Microsoft tools allow for a reduced learning curve and increased user adoption.

The image displays two screenshots of the Dynamics 365 Field Service interface. The top screenshot shows the 'Inspection Activities' page with a sidebar menu and a main content area. The bottom screenshot shows the 'New Inspection Activity' form, which includes fields for Subject, Date Created, Operator, and Unit. The form is titled 'INSPECTION ACTIVITY : INFORMATION' and 'New Inspection Activity'. Below the form, there is a table of 'Active Inspections' with columns for Inspection Number, Inspection Title, Inspection Reason, Lead Inspector, Operator, and Inspection Status.

Inspection Number	Inspection Title	Inspection Reason	Lead Inspector	Operator	Inspection Status
00305	PUC Field Inspection...	Commission's Order	Joseph Verceiotti	Dead River OPID 37079	Unscheduled
00304	20170601AmerigasH...	Self Initiated	David Burnell	AMERIGAS OPID 37367	Draft
00302	20170601AmerigasH...	Self Initiated	David Burnell	AMERIGAS OPID 37367	Final
